

# March for Ventura!

**C**ity employees have demonstrated their willingness to help Ventura through tight budget times. But, as the lowest paid municipal employees in the region, they can only do so much. In the past, through dialogue and compromise, the City of Ventura has always been able to resolve issues

with its employees. But this City Council seems to be out of touch.

If the City Council and City Manager disrespect its workforce, what will it do to the quality of services and morale in the City of Ventura? **It's time to march for Ventura!**
