

CALIFORNIA

Pensionomics 2014:

Measuring the Economic Impact of DB Pension Expenditures

Key Findings

Benefits paid by state and local pension plans support a significant amount of economic activity in the state of California.

Pension benefits received by retirees are spent in the local community. This spending ripples through the economy, as one person's spending becomes another person's income, creating a multiplier effect.

In 2012, expenditures stemming from state and local pensions supported...

- 376,572 jobs that paid \$20.8 billion in wages and salaries
- \$60.3 billion in total economic output
- \$10.9 billion in federal, state, and local tax revenues

... in the state of California.

Each dollar paid out in pension benefits supported \$1.65 in total economic activity in California.

Each dollar "invested" by California taxpayers in these plans supported \$5.96 in total economic activity in the state.

Overview

Expenditures made by retirees of state and local government provide a steady economic contribution to California communities and the state economy. In 2012, 1,084,286 residents of California received a total of \$36.6 billion in pension benefits from state and local pension plans.

The average pension benefit received was \$2,810 per month or \$33,724 per year. These modest benefits provide retired teachers, public safety personnel, and others who served the public during their working careers income to meet basic needs in retirement.

Between 1993 and 2012, 27.68% of California's pension fund receipts came from

employer contributions, 15.45% from employee contributions, and 56.88% from investment earnings. Earnings on investments and employee contributions—not taxpayer contributions—have historically made up the bulk of pension fund receipts.

Impact on Jobs and Incomes

Retiree expenditures stemming from state and local pension plan benefits supported 376,572 jobs in the state. The total income to state residents supported by pension expenditures was \$20.8 billion.

To put these employment impacts in perspective, in 2012 California's unemployment rate was 10.4%. The fact that DB pension expenditures supported 376,572 jobs is significant, as it represents 2.0 percentage points in California's labor force.

Economic Impact

State and local pension funds in California and other states paid a total of \$36.6 billion in benefits to California residents in 2012. Retirees' expenditures from these benefits supported a total of \$60.3 billion in total economic output in the state, and \$37.1 billion in value added in the state.

\$30.3 billion in direct economic impacts were supported by retirees' initial expenditures. An additional \$15.2 billion in indirect impact resulted when these businesses purchased additional goods and services. \$14.8 billion in induced impacts occurred when workers employed by businesses as a result of the direct and indirect impacts made expenditures.

Total Economic Impact \$60.3 billion

DIRECT
IMPACT
\$30.3 billion

INDIRECT
IMPACT
\$15.2 billion

INDUCED
IMPACT
\$14.8 billion

Economic Multipliers

^{*}Caution should be used in interpreting these numbers. See the Technical Appendix of the full Pensionomics report for details.

Impact on Tax Revenues

State and local pension payments made to California residents supported a total of \$10.9 billion in revenue to federal, state, and local governments. Taxes paid by retirees and beneficiaries directly out of pension payments totaled \$2.5 billion. Taxes attributable to direct, indirect and induced impacts accounted for \$8.4 billion in tax revenue.

Total	\$10.9 billion
State/Local Tax	\$6.0 billion
Federal Tax	\$5.0 billion

Economic Impacts by Industry Sector

The economic impact of state and local pension benefits was broadly felt across various industry sectors in California. The ten industry sectors with the largest employment impacts are presented in the table below.

Industry	Employment Impact (# Jobs)	Labor Income Impact	Value Added Impact	Output Impact
Food Services and Drinking Places	35,400	\$915,553,169	\$1,331,553,916	\$2,212,560,817
Physicians, Dentists, and other Health Practitioners	20,939	\$1,659,398,843	\$1,727,529,078	\$2,580,075,861
Real Estate Establishments	18,776	\$355,837,029	\$3,082,182,312	\$3,606,786,649
Private Hospitals	14,930	\$1,406,785,327	\$1,548,509,684	\$2,416,190,073
Wholesale Trade Businesses	13,700	\$1,132,190,509	\$2,045,259,703	\$3,031,404,111
Nursing and Residential Care Facilities	12,674	\$493,428,289	\$560,112,063	\$793,311,627
Retail Stores - General Merchandise	9,763	\$323,987,933	\$557,565,663	\$668,488,834
Retail Stores - Food and Beverage	9,257	\$358,357,345	\$512,943,574	\$665,861,891
Securities, Commodity Contracts, and Investments	8,418	\$598,772,371	\$530,784,934	\$1,450,925,742
Private Household Operations	7,657	\$56,954,626	\$56,954,626	\$56,954,626

Industry totals include the first round of impacts from pension payments to state residents, and do not account for recaptured "leakage" to or from other states.
